Project No. S1701-07-03
December 19, 2023

Westervelt Ecological Services, LLC
3636 American River Drive, Suite 120
Sacramento, CA 95864

Attn: Angela Lagneaux, Senior Conservation Planner

Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT UPDATE REPORT
CACHE SLOUGH MITIGATION BANK
SOLANO COUNTY, CALIFORNIA

Reference: *Phase I Environmental Site Assessment, Powell Property, Solano County, California,*
Geocon Project No. S1701-03-01, February 12, 2019.

*Phase I Environmental Site Assessment Update, Proposed Cache Slough Mitigation
Bank, Solano County, California, Geocon Project No. S1701-03-02, August 26, 2022
(Revised October 3, 2022).*

Ms. Lagneaux:

In accordance with *Consultant Services Agreement* between Westervelt Ecological Services, LLC (WES) and Geocon Consultants, Inc. (Geocon), executed on November 16, 2023, Geocon has performed a Phase I Environmental Site Assessment (ESA) Update of the “Cache Slough Mitigation Bank” (the site) located along State Route 84 in Solano County, California. We performed an initial Phase I ESA of the site in February 2019 and a Phase I ESA Update in August 2022 (revised October 2022), and presented our findings in the referenced Phase I ESA and update reports. The enclosed report describes the Phase I ESA Update and presents our findings, opinions, and conclusions.

We performed the Phase I ESA Update for WES to assess the site for the potential presence of recognized environmental conditions (REC) as defined by ASTM International (ASTM) *Designation E1527-21 – Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The Code of Federal Regulations (CFR) *Standards and Practices for All Appropriate Inquiries* (AAI; CFR Title 40, Part 312) identifies ASTM *Designation E1527-21* as an acceptable guidance document for performing a Phase I ESA that satisfies the federal requirements for AAI under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act. We understand that searches for recorded environmental cleanup liens (required by CFR Title 40 312.25) will be performed by a title company or other real estate professional and not as part of this Phase I ESA Update.

We appreciate the opportunity to have performed this Phase I ESA Update for WES. Please contact us if you have any questions concerning the report and our findings or if we may be of further service.

Sincerely,

GEOCON CONSULTANTS, INC.

Kristopher Williams, GIT
Staff Geologist

John Juhrend, PE, CEG
Senior Engineer

PHASE I ENVIRONMENTAL SITE ASSESSMENT UPDATE REPORT

1.0 INTRODUCTION

Geocon Consultants, Inc. (Geocon) has performed a Phase I Environmental Site Assessment (ESA) Update of the “Cache Slough Mitigation Bank” (the site) located along State Route 84 in Solano County, California. We performed the Phase I ESA Update for Westervelt Ecological Services, LLC (WES) to assess the site for the potential presence of recognized environmental conditions (REC) pursuant to guidelines established by ASTM International (ASTM) Designation *E1527-21 – Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and to identify any changes in site uses and conditions since our previous Phase I ESA Update in August 2022 (Geocon, 2022). We performed the Phase I ESA Update as part of WES’s environmental due diligence prior to WES incorporating the Phase I ESA Update report into WES’ prospectus for the Cache Slough mitigation bank on the site.

This report describes the Phase I ESA methodology and presents our findings, opinions, and conclusions. The report is organized as follows:

- Section 1.0 describes the purpose and objectives of the Phase I ESA Update, defines terms, and describes the Phase I ESA Update services, limitations, and identified data gaps;
- Section 2.0 describes the site’s physical setting and conditions;
- Section 3.0 summarizes information provided by WES as the “user” of the Phase I ESA Update;
- Section 4.0 summarizes readily available records for the site and surrounding properties that we obtained from regulatory and administrative agencies and other sources;
- Section 5.0 describes the historical use of the site and surrounding area ascertained from historical records and information sources;
- Section 6.0 describes the site and surrounding properties and facilities from our observations during the site reconnaissance;
- Section 7.0 summarizes information obtained from interviews of persons familiar with the site;
- Section 8.0 presents our findings and conclusions regarding RECs and recommendations for further environmental assessment, if any;
- Section 9.0 lists the references cited in this Phase I ESA Update report; and
- Section 10.0 provides a qualifications statement from the environmental professional responsible for the Phase I ESA Update and report.

1.1 Purpose and Definitions

The purpose of the Phase I ESA Update was to identify evidence or indications of RECs, or other qualified RECs, at the site as defined by ASTM *Designation E1527-21*. ASTM *Designation E1527-21* defines an REC as “(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or

petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.” "Release" refers to an unauthorized release of a petroleum product or hazardous substance to the environment - i.e., the ground surface, soil, soil vapor, groundwater, or surface water on the site. De minimis conditions are further described as “a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.”

ASTM *Designation E1527-21* also defines “historical” and “controlled” RECs (HREC and CREC, respectively). An HREC is defined as “a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).” A CREC is defined as “recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).” An HREC is not an REC if a property meets current standards for unrestricted residential use. A CREC remains an REC by definition when a property does not meet the unrestricted residential use requirement unconditionally.

We define a “potential environmental concern” as a past use of the site or adjoining or adjacent property that may have involved the use, storage, and/or release of hazardous substances or petroleum products that could have impacted the site, but for which there are no records or other information to confirm that use, storage, or release. An example would be the possible application of pesticides to an agricultural field (i.e., irrigated row crop or orchard), but for which there are no records of such application or confirmation from a knowledgeable person (i.e., site owner/occupant/operator) that pesticides were used at the site.

The Code of Federal Regulations (CFR) *Standards and Practices for All Appropriate Inquiries* (AAI; CFR Title 40, Part 312) identifies ASTM *Designation E1527-21* as an acceptable guidance document for performing a Phase I ESA update that satisfies the federal requirements for AAI under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of AAI is to meet some of the requirements to qualify for certain landowner liability protections under CERCLA. We understand that a title company or other real estate professional will search for recorded environmental cleanup liens and activity and use limitations (AUL) as required by CFR Title 40 312.25, as we did not search for them as part of this Phase I ESA Update.

1.2 Phase I ESA Principles

The following principles are an integral part of ASTM *Designation E1527-21*:

- **“Uncertainty Not Eliminated** – No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a subject property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a subject property, and this practice recognizes reasonable limits of time and cost.”
- **“Not Exhaustive** – All Appropriate Inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information.”
- **“Level of Inquiry is Variable** – Not every property will warrant the same level of assessment. Consistent with good commercial and customary standards and practices as defined at 42 [United States Code] § 9601(35)(B), the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, future intended uses of the subject property disclosed to the environmental professional, and the information developed in the course of the inquiry.”
- **“Comparison with Subsequent Inquiry** – It should not be concluded or assumed that an inquiry was not all appropriate inquiries merely because the inquiry did not identify recognized environmental conditions in connection with a subject property. Environmental site assessments must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent environmental site assessments should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors.”
- **“Point in Time** – The environmental site assessment is based upon conditions at the time of completion of the individual environmental site assessment elements.” The following table lists the Phase I ESA elements and the date they were completed:

Phase I ESA Element	Report Section	Completion Date
Physical Setting Resources	2.0	December 18, 2023
User’s Responsibilities	3.0	November 16, 2023
Government Records	4.0	December 18, 2023
Historical Records	5.0	December 18, 2023
Site Reconnaissance	6.0	November 28, 2023
Owner/Operator/Occupant Interviews	7.0	November 28, 2023
Local Government Official Interviews	4.0	November 27, 2023
Evaluation and Report	8.0	December 19, 2023

Note: **Bold** = Phase I ESA elements that are included in the presumed viability of this report as defined by ASTM *Designation E1527-21* Section 4.6.

Therefore, the information contained herein is valid as of November 28, 2023, and will require an update after 180 days to reflect updated records and another site reconnaissance to assess current site conditions.

1.3 Scope of Services

Geocon's Proposal No. LS-23-451 dated November 15, 2023, (included as an attachment to WES's *Consultant Services Agreement*, executed on November 16, 2023) describes the services for this Phase I ESA Update. We performed the services as outlined in our proposal with the exception that we did not review Sanborn Fire Insurance Maps (Sanborn maps) as Environmental Data Resources, Inc. (EDR) indicated that Sanborn map coverage does not exist for the site and vicinity. The main components of a Phase I ESA Update and their objectives, pursuant to ASTM *Designation E1527-21*, include the following:

- **Physical Setting:** We reviewed various references to obtain information concerning the topographic, geologic, and hydrologic/hydrogeologic characteristics of the site and vicinity. Such information may be indicative of the direction and/or extent that a contaminant could be transported in the event of a spill or release on or near the site.
- **Records Review:** We reviewed publicly available federal, state, and local regulatory agency records to obtain information that could potentially help identify RECs at or potentially affecting the site.
- **Site History:** We reviewed historical information sources to assess previous uses of the site and surrounding area and identify those that could have led to RECs on the site. Those information sources included historical aerial photographs, topographic maps, and city directories. In addition, we conducted interviews with persons who were expected to be reasonably knowledgeable about historical and/or current uses and conditions at of the site.
- **Site Reconnaissance:** We performed a site reconnaissance to observe site uses and conditions for evidence or indications of RECs. We viewed adjoining and adjacent offsite properties and features solely from the vantage of the site and public thoroughfares.

1.4 Report Limitations

We prepared this Phase I ESA Update report exclusively for WES. The information obtained is only relevant for the latest of the dates of the records reviewed, the latest site visit, and completion of interviews with governmental officials and/or site owner(s), occupant(s), and/or operator(s) as cited in Section 1.2.

WES should recognize that a Phase I ESA Update is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, information in the specified regulatory records, and information regarding the historical usage of the site, as presented in this report. WES should also understand that we did not assess the site for wetlands or perform testing (sample collection and laboratory analysis) for asbestos-containing building materials, lead-containing paint, lead in drinking water, radon, mercury and other contaminants related to mining, methane, mold, per- and polyfluoroalkyl substances, or potential naturally occurring hazards such as asbestos and arsenic as part of this Phase I ESA Update. The Phase I ESA Update did not

include sample collection and laboratory analysis, nor did it include the evaluation of regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, air quality or geologic hazards. The information provided in this report is not meant to eliminate the risk involved in property transactions. No guarantee or warranty of the results of the Phase I ESA Update is expressed or implied by this report or any subsequent reports, correspondence, or consultation. We strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

1.5 Data Gaps and Significant Data Gaps

A data gap is defined by ASTM *Designation E1527-21* as “a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.” Data gaps could include such things as insufficient historical information, the inability to interview persons with direct site knowledge (e.g., the owner(s), past owner(s), tenants, workers, etc.) or the lack of access to all parts of a site during the site reconnaissance. As described in Section 1.3, we did not review Sanborn maps for the site as EDR indicated that Sanborn map coverage does not exist for the site and vicinity. However, we were able to review other sufficient historical information and therefore do not consider the lack of Sanborn map coverage a data gap. We identified no data gaps during this Phase I ESA Update.

A “significant” data gap is defined by ASTM *Designation E1527-21* as “a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.” These data gaps are significant if “other information and/or professional experience raises reasonable concerns involving the effects of that data gap on the ability of the environmental professional to render an opinion regarding whether conditions exist that are indicative of recognized environmental conditions or controlled recognized environmental conditions.” We identified no significant data gaps during this Phase I ESA Update.

2.0 SITE DESCRIPTION

This section describes the location and physical characteristics of the site including its size, topography, geologic, soil, and hydrogeologic conditions.

2.1 Location and Legal Description

The site is adjacent to the northwest of State Route (SR) 84/River Road in Solano County, California. The site is situated on the northwestern side of Cache Slough and straddles the eastern city limit of the City of Rio Vista west and southwest of the site (Figure 1).

Within the Public Land Survey System of California, the site is in the southwest quarter of Section 17, the southeast quarter of Section 18, the northeast quarter of Section 19, and the northwest quarter of Section 20 of Township 4 North, Range 3 East, Mount Diablo Base and Meridian.

The site is identified by Solano County assessor's parcel numbers 0177-110-260, 0177-150-010, and 0177-110-130; currently owned by WES. Parcel maps depicting the site are in Appendix A.

2.2 Site and Vicinity General Characteristics

The approximate 363-acre site is predominately livestock grazing land (rangeland) and marshland. The site is in the western portion of the Sacramento-San Joaquin River Delta (the delta). The site is surrounded by similar wetland and delta farmland, and commercial/industrial development on the adjoining and adjacent properties west and southwest of the site (Figure 2). The confluence of the Sacramento River and Cache Slough is adjacent to the southeast of the site.

2.2.1 Topography

The topography of the site is characterized as generally flat-lying with elevations ranging from approximately mean sea level (MSL, 0 feet) to approximately 10 feet above MSL (United States Geological Survey [USGS], 2022). Onsite levees are depicted along a canal and along the western and southeastern site boundaries with top-of-levee elevations up to approximately 20 feet above MSL (USGS, 1993).

2.2.2 Geologic Conditions

We obtained site geologic information from a variety of sources including:

- CalGEM online mapping system (CalGEM, 2023);
- *California Geology* (Harden, 2003);
- *Geologic Map of the Sacramento Quadrangle*, (California Division of Mines and Geology [CDMG], 1981);
- *Note 36, California Geomorphic Provinces* (California Geological Survey [CGS], 2002); and
- *2010 Fault Activity Map of California* (CGS, 2010).

Following are summaries of pertinent information obtained.

2.2.2.1 Geomorphic Region

The site is located in the southern Sacramento Valley, which is in the northern portion of the Great Valley geomorphic province of California. The Great Valley is a sedimentary basin between the Sierra Nevada mountains and Cascade Range on the east and the Coast Ranges on the west. The Great Valley is filled with a thick sequence of Jurassic- to Recent-age sedimentary deposits both continental and marine in origin (CGS, 2002 and Harden, 2003).

2.2.2.2 Geologic Formations/Stratigraphy

The referenced geologic map indicates that the site is primarily underlain by Quaternary intertidal deposits (map symbol Qi) and alluvium (map symbol Qo) (CDMG, 1981). The California Geologic Energy Management Division's (CalGEM) Well Finder online petroleum (oil and gas) field and well mapping

system, shows a plugged well, *Amerada Hess Corp. "RVGU" 41*, approximately 650 feet north of the site. The boring log for this well indicates that approximately 70 feet beneath the surface are interbedded layers of shale and sandstone with thicknesses ranging from tens to hundreds of feet (CalGEM, 2023).

2.2.2.3 Faulting

The Quaternary Midland Fault extends northwest-southeast across the eastern portion of the site (CDMG, 1981 and CGS, 2010).

2.2.3 Soil Conditions

The United States Department of Agriculture – Natural Resources Conservation Service *Web Soil Survey* (<http://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx>) indicates that surficial soil on the site is primarily classified as:

- **Pescadero silty clay loam:** clay loam to silty clay loam alluvium weathered from igneous, metamorphic, and sedimentary rock; and
- **Valdez silt loam:** silty loam to very fine sandy loam from fine-silty alluvium weathered from igneous, metamorphic, and sedimentary rock.

2.2.4 Hydrologic and Hydrogeologic Conditions

An irrigation canal is present in the northern and eastern portions of the site and the central portion is flooded. Cache Slough and the Sacramento River are adjacent to the southeast of the site.

Data Logger (DL) 14, *DL 15* (abandoned), and *DL 16.2* monitoring wells located in the northern, western, and southern portions of the site, respectively. During our previous Phase I ESA Update, Dayna Cormany, with WES, indicated that depth to groundwater in *DL 14* ranged from 0 to 7.5 feet from February 2020 to June 2022, and 1.9 to 4.7 feet in *DL 16.2* from March to June 2022.

Depth to groundwater at the site may fluctuate due to seasonal fluctuations in river and slough levels and rainfall, and can also be affected by localized pumping and irrigation practices, including seasonal variations of those practices. Groundwater flow direction beneath the site is likely to vary due to the above-mentioned reasons and in particular, the stage of the river and slough. During high river stages, groundwater flow may be away from the river and during low stages, may be towards the river.

2.3 Current and Planned Uses of the Site

The site is used for livestock grazing and waterfowl hunting. WES plans to use the site for livestock grazing and wetland restoration.

2.4 Descriptions of Structures, Roads, Other Improvements on the Site

A corral is in the western portion of the site. A natural gas well with an associated shed is in the northern portion of the site. Information pertaining to this well is provided in Section 4.3.4. Monitoring wells are in the northern, western, and southern portions of the site and unimproved roads are in the western, northern, and eastern portions. Levees are present along the canal and the western and southeastern site boundaries. Further description of site conditions is in Section 6.0.

2.5 Current Uses of Adjoining and Adjacent Properties

Delta farmland is north and northeast of the site. The Sacramento River and Cache Slough are southeast of the site beyond which is delta farmland. Commercial/industrial structures are southwest of the site. Rock stockpiles are present on the adjoining property southwest of the site. These stockpiles were placed in February 2008 for the Delta Emergency Rock and Transfer Facilities Project, which is designed to provide materials for flood protection in the event of a levee failure (AECOM, 2011). Rio Vista Sand Pit, a construction sand and gravel (or aggregate mining) facility, operated by Asta Construction Co., Inc. is on the adjoining property west of the site.

3.0 USER-PROVIDED INFORMATION

This section summarizes information regarding the site that Angela Lagneaux with WES (the “user” of this Phase I ESA Update) provided to us. We provided Ms. Lagneaux with a User Questionnaire to obtain information regarding the past and present use of the site and the potential for RECs related to the use, storage, or disposal of hazardous substances and/or petroleum products on the site. A copy of Ms. Lagneaux’s responses to the User Questionnaire is in Appendix B.

3.1 Title, Appraisal and Sale Agreement Records

Ms. Lagneaux provided us with a *Preliminary Report* regarding the title (title report) for the site prepared by Placer Title Company dated April 25, 2023. The *Preliminary Report* notes no items indicating or suggesting impacts to the environmental conditions of the site. WES did not provide us with an appraisal or sale agreement records for the site.

3.2 Environmental Liens or Activity and Use Limitations

Ms. Lagneaux indicated that there are two easements on the site with the Sacramento San Joaquin Flood Control District (SSFCD); one to convey flood waters across the site, and the other to convey flood waters, restrict the building of permanent structures, and restrict the growth of “certain plants and crops” in “a portion of the site.”

3.3 Specialized Knowledge

Ms. Lagneaux indicated that WES reached out to a local resident of Rio Vista, whose family member was a former farmer of the site in the 1950s and 1960s. The local resident stated that the site appeared to contain dredge materials from the river, and that the site was alkaline; only alfalfa and safflower was cultivated on the site. WES also interviewed a former hunter of the site, who stated areas in the northern portion of the site were dug to create ponding and attempts were made to dig irrigational ditches in the southern portion of the site but were unsuccessful. The site was then irrigated for grazing when cultivation ended.

We also asked Ms. Lagneaux if she had knowledge of legal or administrative proceedings involving the site and she indicated that she did not.

3.4 Commonly Known or Reasonably Ascertainable Information

Ms. Lagneaux indicated she is aware the past use of the site was for agriculture and hunting purposes.

3.5 Valuation Reduction for Environmental Issues

Ms. Lagneaux is not aware of any environmental conditions on the site that could lead to a potential valuation reduction for the site.

3.6 Owner, Property Manager, and Occupant Information

WES is the owner of the site. Ms. Lagneaux also completed a Site Owner/Occupant Questionnaire for the site. Information from the questionnaire is summarized in Section 7.0.

3.7 Reason for Performing Phase I ESA Update

WES requested the Phase I ESA Update to obtain information regarding the potential presence of RECs at the site prior to WES incorporating the Phase I ESA Update report into WES' prospectus for the proposed Cache Slough mitigation bank on the site.

3.8 Previous Documents

We also asked Ms. Lagneaux if she knew of previous environmental reports or documents that may exist and, if so, whether copies could be provided. She indicated that she is aware of our 2019 Phase I ESA and 2022 Phase I ESA Update reports for the site prepared for WES.

Our previous Phase I ESA and update reports revealed that the site had been used for agricultural purposes from sometime prior to 1964 until sometime prior to 1993. Pesticides applied during the 1950s to the 1970s may have included environmentally persistent pesticides such as organochlorine pesticides (OCP) and may be present in site soil as a result. The potential presence of OCPs and associated metals in site soil is a potential environmental concern. However, we recommended no

further assessment at that time since WES planned to continue the agricultural and wetland restoration uses of the site. However, if the planned use of the site were to change, then we would recommend that shallow soil on the site be assessed for the potential presence of OCPs and associated metals.

The Phase I ESA report revealed that an active natural gas well, *California Resources Production Corporation “RVGU” 45*, is located in the northwestern portion of the site and a plugged natural gas well, *Amerada Hess Corp. “RVGU” 41*, is reported to have been in the northern portion of the site. During our 2022 Phase I ESA Update, the “RVGU” 45 well was listed as idle (CalGEM, 2022). This well currently has an approved Notice of Intention (NOI) to be abandoned (CalGEM, 2023). Ms. Lagneaux indicated that this well will be abandoned in 2024.

4.0 RECORDS REVIEW

This section summarizes information we obtained from readily available agency records pertaining to the site and properties and facilities in the vicinity of the site.

4.1 Standard Environmental Record Sources

EDR searched federal, state, and local environmental databases for listings pertaining to the site and properties/facilities within one mile of the site. The following table shows the databases that list the site and/or offsite properties/facilities and the total number of listed properties/facilities for each database. Databases that list no properties/facilities within one mile of the site are not included in the table. A copy of *The EDR Radius Map Report with Geocheck* (radius report), dated November 22, 2023, is in Appendix C.

Database Name	Search Radius (Miles)	Number of Listings
FEDERAL DATABASES		
Resource Conservation and Recovery Act – Small Quantity Generator (RCRA-SQG)	0.25	1
STATE, LOCAL, AND TRIBAL DATABASES		
Solid Waste Information System (SWF/LF)	0.5	1
Leaking Underground Storage Tank (LUST)	0.5	1
Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups sites (CPS-SLIC)	0.5	1
Aboveground Storage Tank (AST)	0.25	1
ADDITIONAL ENVIRONMENTAL RECORDS		
Waste Management Unit Database (WMUDS/SWAT)	0.5	1
California Environmental Reporting System Hazardous Waste (CERS HAZ WASTE)	0.25	1
SWEEPS UST (Statewide Environmental Evaluation and Planning System – UST Listing)	0.25	1

Database Name	Search Radius (Miles)	Number of Listings
RCRA Non Generators (NonGen)/No Longer Regulated (NLR)	0.25	3
Cortese ("Cortese" Hazardous Waste & Substances Sites List)	0.5	1
HIST CORTESE	0.5	1
MINES (Mines Site Location Listing)	0.25	1
Proposition 65 Records (Notify 65)	1.0	1

4.1.1 Site

The site is not listed on any of the databases searched by EDR.

4.1.2 Offsite Properties

Two properties within $\frac{1}{8}$ mile of the site are listed on various non-release-related databases¹. Following are summaries of information for properties/facilities less than $\frac{1}{8}$ mile from the site (or $\frac{1}{4}$ mile for LUST facilities) that are listed on one or more release-related databases, the status of their listings, and their potential, if any, to cause (or have caused) an REC at the site.

¹ "Release" refers to an unauthorized release of a petroleum product or hazardous substance to the environment - i.e. the ground surface, soil, soil vapor, groundwater, or surface water on a property. "Release-related database" refers to those which provide information regarding an unauthorized release. "Non-release-related database" refers to those that may report use, storage, or disposal of hazardous substances and/or petroleum products or other environmental conditions, but do not report releases of such.

Business	Address	Approximate Distance from the Site	Database	Pertinent Information/Potential to Cause an REC at the Site
Rio Vista Sand Pit	PO BOX 758	0 feet west (adjoining property upgradient)	MINES	The MINES database lists the DWR State Reclamation Board as the owner of this property, and operated by Asta Construction Company, Inc.. As of 2021, 408 acres of fill dirt was permitted for mining at this property. The lack of reported releases and/or violations suggest this facility is unlikely to have caused an REC at the site.
Paul Graham Drilling & Service Co./Weatherford US LP	680 River Road	1,050 feet southwest (up- to cross-gradient)	AST, CERS HAZ WASTE, CERS, RCRA-SQG, FINDS, ECHO, RCRA NonGen/NLR	<p>The AST database indicates that a 7,500-gallon aboveground storage tank (AST) (contents not listed) was installed at this facility.</p> <p>The CERS database lists several compliance violations in 2014 and 2022; neither of which indicate a release of hazardous substances or petroleum products.</p> <p>The lack of inclusion of this facility on any release-related databases and the distance of this facility from the site suggest that this facility is unlikely to have caused an REC at the site.</p> <p>The CERS HAZ WASTE, RCRA-SQG, FINDS, ECHO, and RCRA NonGen/NLR databases provide no pertinent information.</p>

4.2 Orphan Summary

The Orphan Summary identifies properties and facilities that have incomplete address information and therefore could not be accurately plotted. The Orphan Summary lists two facilities, former Five Star Petroleum and former BC Stocking Bulk Terminal, both of which are greater than ¼ mile from the site. The distance of these facilities from the site suggests that they are unlikely to have caused an REC at the site.

4.3 Other Environmental Record Sources

4.3.1 GeoTracker and EnviroStor

We reviewed information available on the State Water Resources Control Board’s (SWRCB) GeoTracker (<http://geotracker.waterboards.ca.gov>) and the California Department of Toxic Substance Control’s (DTSC) EnviroStor (<http://www.envirostor.dtsc.ca.gov/public/>) online environmental data management systems for information regarding documented environmental assessment and cleanup at the site and/or properties/facilities within ¼ mile of the site. No information pertaining to the site or properties/facilities within ¼ mile of the site is available on GeoTracker or EnviroStor.

4.3.2 Solano County Environmental Health Division

We submitted a request to the Solano County Environmental Health Division (SCEHD) for records pertaining to the use, storage, disposal, or any releases of or violations related to hazardous substances and/or petroleum products at the site. SCEHD staff provided us with a memorandum and parcel map, dated May 15, 2006, regarding an adjustment to property boundaries at the site, and a boring permit pertaining to Hultgren-Tillis Engineers advancing eight soil borings at the site for a geotechnical investigation.

4.3.3 Solano County Department of Agriculture/Weights & Measures

We submitted a request to the Solano County Department of Agriculture/Weights & Measures (SCDAWM) for records pertaining to permitted pesticide use at the site. SCDAWM staff communicated that they did not have any permitted pesticide use records pertaining to the site.

4.3.4 California Geologic Energy Management Division

The California Geologic Energy Management Division's (CalGEM) Well Finder, an online petroleum (oil and natural gas) field and well mapping system, shows one idle well, *California Resources Production Corporation "RVGU" 45*, located in the northwestern portion of the site (Figure 2). This well was reported to have been active from January 1977 to May 2017 (CalGEM, 2023). During our site reconnaissance, the well and associated equipment appeared to be inactive (Section 6.0). As summarized in Section 3.8, this well currently has an approved NOI (Permit No. 7039827) to be abandoned (CalGEM, 2023); which Ms. Lagneaux indicated will occur in 2024.

There are 24 gas wells within one mile of the site, which are described in a separate report regarding mineral resources on and near the site. This report is entitled *Minerals Assessment Update Report* dated August 26, 2022 (revised October 7, 2022).

4.3.5 National Pipeline Mapping System

The National Pipeline Mapping System online pipeline mapping system does not show any natural gas or liquid petroleum pipelines on or within ¼ mile of the site (USDOT, 2023).

5.0 HISTORICAL USE

We evaluated the historical use of the site and adjoining and adjacent properties through review of historical aerial photographs, topographic maps, and city directories provided by EDR. This section summarizes information obtained from these sources.

5.1 Aerial Photographs

We reviewed historical aerial photographs for the years 1937, 1952, 1957, 1964, 1968, 1972, 1984, 1993, 2006, 2009, 2012, and 2016 (Appendix D) and 2021, 2022, and 2023 (available on Google Earth) for indications of past land uses that had the potential to have impacted the site through the use, storage or disposal of hazardous substances and/or petroleum products. The following table summarizes our observations of the site and adjoining and adjacent properties on the historical aerial photographs.

Year	Observations	
	Site	Adjoining and Adjacent Properties
1937 (1" = 875')	The site was flooded marshland with an unimproved road, structure, and rangeland in the northern portion of the site.	The adjoining and adjacent properties were similar flooded marshland and open rangeland. Structures were southeast of the site beyond which were an improved road (SR 84), Cache Slough and the Sacramento River. Structures and an unimproved road were southwest of the site.
1952 (1" = 875')	The site appears to have been largely filled/graded and in possible use for dry and irrigated farming. Two linear features (berms or ditches) extended northeast-southwest across the central portion of the site. The current canal was present and extended east-west in the northern portion of the site, then turned and extended northwest-southeast in the eastern portion. A structure and additional unimproved roads were in the northern and western portions of the site.	Structures southeast of the site were no longer present; however, additional commercial/industrial structures were present on the adjoining and adjacent properties southwest of the site. The canal extended west from the western portion of the site, then turned and extended north-south along the adjacent property northwest of the site. Remnants of wetlands that appear to have been filled extended east and north of the canal.
1957 (1" = 875')	Conditions were similar to those observed on the 1952 photograph.	Conditions were similar to those observed on the 1952 photograph except farmland was present northeast of the site and additional commercial/industrial structures and a farmed area were present on adjoining and adjacent properties southwest of the site. An area of disturbed land (possible aggregate mining) was approximately 1,700 feet southwest of the site.

Year	Observations	
	Site	Adjoining and Adjacent Properties
1964 (1" = 875')	The areas of the site south of the canal appears to have been irrigated farmland with four linear features (berms or ditches) extending northeast-southwest. The pad and access road to the existing natural gas well (<i>California Resources Production Corporation "RVGU" 45</i>) were present in the northwestern portion of the site. Unimproved roads were present along the canal, berms, and the western and southwestern site boundaries.	Conditions were similar to those observed on the 1957 photograph except additional commercial/industrial structures, roads, irrigated farmland, and more disturbed land (possible aggregate mining) were present southwest of the site.
1968 (1" = 875')	Conditions were similar to those observed on the 1964 photograph.	Conditions were similar to those observed on the 1964 photograph except additional farmland was present northeast of the site and additional commercial/industrial structures and more disturbed land (possible aggregate mining) were present southwest of the site.
1972 (1" = 875')	Conditions were similar to those observed on the 1968 photograph.	Conditions were similar to those observed on the 1968 photograph.
1984 (1" = 875')	Conditions were similar to those observed on the 1972 photograph.	Conditions were similar to those observed on the 1972 photograph except additional farmland was present on the adjoining properties north and northeast of the site. Disturbed land (Rio Vista Sand Pit) was present west of the site.
1993 (1" = 875')	Conditions were similar to those observed on the 1984 photograph except areas south of the canal consisted of mostly fallow land with marshland present in the northwestern portion of the site.	Conditions were similar to those observed on the 1984 photograph except additional disturbed areas (aggregate mining) were present on the adjoining property west of the site.
2006 (1" = 875')	Conditions were similar to those observed on the 1993 photograph except additional marshland was present throughout the site.	Conditions were similar to those observed on the 1993 photograph except the aggregate mining facility southwest and west of the site appeared to be inactive.
2009 (1" = 875')	Conditions were similar to those observed on the 2006 photograph.	Conditions were similar to those observed on the 2006 photograph except the aggregate mining facility west of the site appeared to be active. Rock stockpiles were present southwest of the site.
2012 and 2016 (1" = 875') and 2021, 2022, and 2023 (Google Earth)	Conditions were similar to those observed on the 2009 photograph.	Conditions were similar to those observed on the 2009 photograph.

The site appears to have been cultivated from as early as 1964 to sometime prior to 1993. Agricultural chemicals, if applied during the 1950s to 1970s, may have included environmentally persistent pesticides such as the OCPs (and associated metals such as arsenic and lead). As a result, OCPs and metals may be present in site soil and are a potential environmental concern for the site.

The aerial photographs do not show other features or land uses that directly suggest the presence of conditions or features on the site or on adjoining and adjacent properties likely to have caused an REC at the site.

5.2 Topographic Maps

We reviewed historical topographic maps provided by EDR for the years 1910, 1952, 1953, 1968, 1978, 1993, and 2012 (Appendix E). The following table summarizes our observations of the site and adjoining and adjacent properties on the historical topographic maps.

Year	Observations	
	Site	Adjoining and Adjacent Properties
1910 (1:31,680)	The site is depicted as mostly flooded marshland.	Similar marshland is depicted north, northeast, southwest, and west of the site. The Sacramento River is depicted southeast of the site. Two structures are depicted southeast and southwest of the site and a road (SR 84) extending northeast-southwest is depicted southeast of the site.
1952 and 1953 (1:62,500) and (1:24,000)	A canal is depicted in the northern and eastern portions of the site, with a levee depicted along the northern side of the canal. An unimproved road extending northwest-southeast is depicted along the southern side of the canal.	Windmills are depicted north and northeast of the site. A gas well and additional structures are depicted southwest of the site. Other gas wells are depicted approximately 0.3 and 0.6 miles west and northwest of the site, respectively. Levees are depicted extending northeast-southwest adjacent to the southeast and southwest of the site, and north-south adjacent to the north of the site.
1968 (1:24,000)	Four linear features (berms or ditches) are depicted extending northeast-southwest across the site. A structure and an unimproved road are depicted in the northwestern portion of the site.	Conditions depicted are similar to those on the 1952 and 1953 maps except an additional structure is depicted southwest of the site and SR 84 is depicted as a secondary highway. "Pits" are depicted southwest of the site.
1978 (1:24,000)	Conditions depicted are similar to those on the 1968 map except the structure is no longer depicted in the northwestern portion of the site.	Conditions depicted are similar to those on the 1968 map.
1993 (1:24,000)	Conditions depicted are similar to those on the 1978 map.	Conditions depicted are similar to those on the 1978 map.
2012 (1:24,000)	Conditions depicted are similar to those on the 1993 map except no structures or roads are depicted.	Conditions depicted are similar to those on the 1993 map except no structures are depicted.

We also reviewed the USGS 2015, 2018, and 2022 7.5-minute topographic maps, which depicted similar conditions to those on the 2012 map. The topographic maps do not depict features or land uses that directly suggest the presence of conditions on the site or on adjoining and adjacent properties likely to cause an REC at the site.

5.3 City Directories

EDR prepared an abstract of city directories including city, cross-reference, and telephone directory listings (Appendix F). EDR included information from directories at approximate 5-year intervals, if available, from 1975 to 2014. The site does not have an address and, therefore, is not listed on the city directories. The adjoining property at 750 River Road southwest of the site is listed in the city directories as DCC Engineering Co., Inc. and Reclamation Services Inc. in 1995, Vintage Petroleum, Inc., Gaines Well Service, and Dutra Construction Co., Inc. in 2005, and Occidental Transaction 1 LLC in 2010. These facilities are not listed on any release-related databases and therefore, are not likely to have caused an REC at the site. No other entities listed on the city directories directly suggest the presence of RECs on the site or uses or conditions on adjoining and adjacent properties likely to cause an REC at the site.

6.0 SITE RECONNAISSANCE

This section summarizes our observations of the site and surrounding properties during the site reconnaissance.

6.1 Methodology and Limiting Conditions

Kris Williams, Staff Geologist with Geocon, performed the site reconnaissance on November 28, 2023, by driving and walking throughout the site to observe site features and conditions. He was accompanied by Ms. Cormany, with WES, who provided access to all areas of the site. Mr. Williams performed the offsite survey by observing adjoining and adjacent properties from the site and public roads. Weather on the day of the site reconnaissance was sunny with temperatures in the high-50s°F. Photographs of various site features and offsite properties are appended.

6.2 Site Setting

The site is situated in an area of delta farmland and waterways, commercial/industrial businesses, and undeveloped land.

6.3 Onsite Survey

The site is predominantly open space and rangeland (Photos 1 and 2) with an irrigation canal (Photo 3) along the northern and northeastern site boundaries. We observed the natural gas well (Photo 4) in the northwestern portion of the site. Monitoring wells are present in the northern, western, and southern portions of the site. Unimproved roads (Photo 5) extend northwest-southeast in the southwestern and northeastern portions of the site and northeast-southwest in the western portion. Levees are present along the irrigation canal (Photo 6) and along the western and southern site boundaries. Overhead electrical transmission lines (Photo 7) extend northeast-southwest in the northern portion of the site and along the southeastern site boundary. Barbed-wire fencing is present along the western and southern site boundaries.

6.3.1 Open Space and Rangeland

A corral (Photo 8) is in the western portion of the site. We observed an empty approximate 1,000-gallon water aboveground storage tank (AST) (Photo 9) and a water trough at the corral. A dilapidated cargo truck is adjacent to an unimproved road (Photo 10) in the southern portion of the site. We did not observe any de minimis staining beneath the cargo truck. Concrete and sparse metal debris (Photos 11 and 12) are approximately 200 feet southeast of the cargo truck along the southern site boundary.

A water pump in the irrigation canal (Photo 13) is connected to a pole-mounted transformer adjacent to the south of the canal in the northern portion of the site. The transformer appeared to be in good condition with no evidence of leakage, and we observed a “Non-PCB” label on the transformer (Photo 14). A water flow control gate (Photo 15) that supplies water to an irrigation ditch is approximately 75 feet east of the irrigation pump and appeared to be open during the site reconnaissance. We observed soil stockpiles approximately 50 feet north of the irrigation ditch and approximately 90 feet west of the pole-mounted transformer in the northern portion of the site (Photo 16). We did not observe any staining or trash on the ground or around the stockpiles. Another water flow control gate (Photo 17) is located approximately 1,500 feet southwest of the irrigation pump in the northern portion of the site and appeared to be open. The water flowing in from this water control gate has partially flooded the central portion of the site (Photo 18).

6.3.2 Natural Gas Well

The *California Resources Production Corporation “RVGU” 45* natural gas well (Photo 4) is located approximately 550 feet east of the western site boundary and approximately 600 feet south of the canal. The well is on a pad that supports a shed with various piping, an AST labeled “Produced Water,” and the well head. Piping is also present east of the shed. The well appeared to be inactive with no piping connected to the well head. We did not observe staining around the well or its related structures and piping. Ms. Lagneaux indicated that this well is scheduled to be abandoned in 2024.

6.3.3 Monitoring Wells

We observed monitoring wells *DL 14* (Photo 19), *DL 16.2* (Photo 20), and *DL 15* (abandoned) located approximately 625 feet northeast of the natural gas well, approximately 300 feet northwest of the southeastern site boundary, and approximately 975 feet north of the corral, respectively.

We observed no evidence of RECs or features or conditions likely to cause an REC at the site.

6.4 Offsite Survey

Adjoining and adjacent properties consist of the following:

- North – farmland (Photo 21);
- East – SR 84/River Road beyond which is the Sacramento River, Cache Slough, and delta farmland (Photos 22 and 23);

- South – an unimproved road atop a levee, beyond which are commercial structures (Photo 24) and rock stockpiles (Photo 25); and
- West – Rio Vista Sand Pit (Photo 26), operated by Asta Construction Co., Inc.

The rock stockpiles adjacent to the southwest of the site were placed in February 2008 and are a part of the Delta Emergency Rock and Transfer Facilities Project, which is designed to provide materials for flood protection in the event of a levee failure (AECOM, 2011). We observed no conditions or uses on the adjoining and adjacent properties likely to cause or have caused an REC at the site.

6.5 Features, Activities, Uses, and Conditions Not Observed To Be Present

ASTM Designation E1527-21 states “During the site visit, the environmental professional (or the person under the supervision or responsible charge of the environmental professional) shall look for and identify the features, activities, uses, and conditions specified in 9.4.1 through 9.4.28. Any of the specified features, activities, uses, and conditions identified in, on, or at the subject property shall be described in the report. If any of the specified features, activities, uses, or conditions are not found to be present in, on, or at the subject property, the environmental professional shall document as such in the report.” The features, activities, uses and conditions that were present during our site reconnaissance are described in Sections 6.2 through 6.4. The following are features, activities, uses and conditions that were not observed to be present during the site reconnaissance:

- Past use of site;
- Past uses of adjoining properties;
- Potable water supply/source;
- Sewage disposal system;
- Hazardous substances and petroleum products in connection with identified uses;
- Strong, pungent, or noxious odors;
- Standing surface water and pools or sumps containing liquids likely to be hazardous substances or petroleum products;
- Drums, totes, and intermediate bulk containers;
- Hazardous substance and petroleum product containers not in connection with identified uses;
- Unidentified substance containers;
- Polychlorinated biphenyls (PCB)-containing items;
- Heating/cooling;
- Stains or corrosion on floors, walls, or ceilings;
- Drains and sumps;
- Pits, ponds, or lagoons;
- Stained soil or pavement;
- Stressed vegetation; and
- Septic systems or cesspools.

7.0 INTERVIEWS

We provided Ms. Lagneaux with a Site Owner/Occupant Questionnaire to obtain information regarding the past and present use of the site and the potential for impacts related to the use, storage, or disposal of hazardous substances and/or petroleum products on the site. Ms. Lagneaux indicated the past uses of the site were agriculture and natural gas exploration, and cattle grazing and waterfowl hunting had occurred at the site since approximately 1993. She also indicated that the idle natural gas well has been on the site for approximately 70 years; scheduled to be abandoned in 2024. Ms. Lagneaux indicated that the property southwest of the site is a quarry, and that the mined aggregate is potentially former dredged material from the Sacramento River and Cache Slough. A copy of Ms. Lagneaux's responses to the Site Owner/Occupant Questionnaire is in Appendix G.

8.0 FINDINGS AND CONCLUSIONS

We have performed a Phase I ESA Update, in general conformance with the scope and limitations of ASTM *Designation E1527-21* of the Cache Slough Mitigation Bank located along SR 84 in Solano County, California. Exceptions to, or deletions from, this practice are described in Section 1.4 (limitations) and Section 1.5 (data gaps). The Phase I ESA Update has revealed no evidence of RECs, CRECs, or significant data gaps in connection with the site or on adjoining or adjacent properties.

The past agricultural use on the site from as early as 1964 to sometime prior to 1993 is considered a potential environmental concern for the site, as pesticides applied during the 1950s to 1970s (if any) may have included environmentally persistent pesticides such as organochlorine pesticides (and associated metals such as arsenic and lead) may be present in soil as a result. Given the planned livestock grazing and wetland restoration of the site, we do not recommend an assessment of soil for pesticides at this time. If the land use of the site is planned to change (i.e., residential, institutional, daycare), collection and chemical analysis of soil samples to assess the potential presence or absence of persistent pesticides and associated metals in shallow soil on the site may be warranted.

10.0 QUALIFICATIONS

This Phase I ESA Update report was prepared by Kristopher Williams, GIT, and reviewed by John Juhrend, PE, CEG. Mr. Williams is a Staff Geologist with a Bachelor of Science (BS) degree in Geology and has worked on a variety of environmental assessment projects.

Mr. Juhrend has over 36 years of experience in the environmental and geotechnical consulting industry in California and Nevada. Mr. Juhrend is a California Professional Engineer and Certified Engineering Geologist, with a BS degree in engineering geology and MS degree in civil engineering. His personal experience includes the performance of hundreds of environmental projects including Phase I and Phase II site assessments, remedial investigations and feasibility studies, corrective action programs and litigation support. His primary expertise includes environmental assessments of Brownfields properties, industrial, commercial and residential properties, and transportation corridors.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries investigation in conformance with the standards and practices set forth in 40 CFR Part 312.

Kristopher Williams, GIT
Staff Geologist

John Juhrend, PE, CEG
Senior Engineer

User Questionnaire

1. What is the purpose of the Phase I Environmental Site Assessment? What is the planned use?
Mitigation Bank Agency Reviews
2. Who is the property owner(s)?
Westervelt Ecological Services
3. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?
No
4. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place for the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?
There is an easement to convey flood waters across the site dedicated to the Sacramento San Joaquin Flood Control District (SSFCD). There is a second easement over a portion of the site dedicated to SSFCD to convey flood waters, and to restrict the building of permanent structures and the growth of certain plants or crops.
5. Do you have any specialized knowledge related to the property or nearby properties?
The property has been used for grazing and private wildlife hunting for the last approximately 30 years. Prior crop production was primarily hay with some safflower. Site contain dredge fill from the river when the river was widening. Likely consisted of hydraulic mining deposits.
6. Does the purchase price reasonably reflect the fair market value of the property?
Yes – Purchased in 2019.
7. Do you know the past uses of the property?
Agriculture/waterfowl hunting

Westervelt reached out to Louie Lira who is a local and whose father previously farmed the property in the 50's/60's. He said that the site was fairly rocky (maybe some dredge materials from river) and alkaline and not great for farming but they did grow alfalfa on the front two fields (near river). Last time they grew alfalfa he thinks was the late 60's. After that they grew some safflower for a time. We also reached out to Harry Gamaza who hunted on the property for about 6 years when Walter Powell owned it. Harry said they dug out a little on the north end of the property to create some ponding and installed a blind. He recalled that they tried to dig some ditches to get water across to the south side of the property but that was not very effective. He also said the property was irrigated for grazing after cultivation ended.
8. What is the planned use of the property?
Wetland restoration
9. Do you know of specific chemicals that are present or once were present at the property?
No
10. Do you know of spills or other chemical releases that have taken place at the property?
No
11. Do you know of any environmental cleanups that have taken place at the property?
No

12. Do you know whether any helpful documents exist and, if so, whether copies can and will be provided for this assessment? These documents may include: Phase I or II Environmental Site Assessment reports, environmental compliance audit reports, environmental permits, registrations for underground or aboveground storage tanks, registrations for underground injection systems, or any other documents related to the property.

A Phase I was completed by GEOCON for the property under project name Powell Property in February 2019 and updated in 2022 (Project No. S1701-03-01)

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 WMUDS/SWAT site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 07/17/2023 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WEATHERFORD	680 RIVER RD	S 1/8 - 1/4 (0.215 mi.)	B5	14

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
COBALT FLEET MAINTEN EPA ID:: CAL000456888	750 RIVER RD	S 0 - 1/8 (0.067 mi.)	A1	9

Violation Source: CERS,

Site ID: 55767
Site Name: Weatherford
Violation Date: 10-16-2014
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 06/16/2016.
Violation Division: Solano County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 55767
Site Name: Weatherford
Violation Date: 04-21-2022
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: The employee training plan or records shall show that all employees who handle Hazardous Waste have received training regarding Hazardous Waste Management and Emergency Response at least annually. The training document uploaded to CERS does not contain this information. Update training record with a list of who was trained, and when, and either resubmit to CERS or update CERS to indicate that these files are now maintained on site within 30 days (5-25-2022).

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Registry ID: 110002805340

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/21/2023	Source: Drug Enforcement Administration

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

ENF: Enforcement Action Listing

A listing of Water Board Enforcement Actions. Formal is everything except Oral/Verbal Communication, Notice of Violation, Expedited Payment Letter, and Staff Enforcement Letter.

Date of Government Version: 07/17/2023	Source: State Water Resources Control Board
Date Data Arrived at EDR: 07/18/2023	Telephone: 916-445-9379
Date Made Active in Reports: 10/05/2023	Last EDR Contact: 10/17/2023
Number of Days to Update: 79	Next Scheduled EDR Contact: 01/29/2024
	Data Release Frequency: Varies

Financial Assurance 1: Financial Assurance Information Listing

Financial Assurance information

Date of Government Version: 09/13/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 09/14/2023	Telephone: 916-255-3628
Date Made Active in Reports: 09/21/2023	Last EDR Contact: 09/13/2023
Number of Days to Update: 7	Next Scheduled EDR Contact: 01/29/2024
	Data Release Frequency: Varies

Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 08/03/2023	Source: California Integrated Waste Management Board
Date Data Arrived at EDR: 08/16/2023	Telephone: 916-341-6066
Date Made Active in Reports: 11/01/2023	Last EDR Contact: 11/13/2023
Number of Days to Update: 77	Next Scheduled EDR Contact: 02/19/2024
	Data Release Frequency: Varies

ICE: Inspection, Compliance and Enforcement

Contains data pertaining to the Permitted Facilities with Inspections / Enforcements sites tracked in Envirostor.

Date of Government Version: 08/14/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 08/14/2023	Telephone: 877-786-9427
Date Made Active in Reports: 10/31/2023	Last EDR Contact: 11/10/2023
Number of Days to Update: 78	Next Scheduled EDR Contact: 02/26/2024
	Data Release Frequency: Quarterly

HIST CORTESE: Hazardous Waste & Substance Site List

The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

Date of Government Version: 04/01/2001	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/22/2009	Telephone: 916-323-3400
Date Made Active in Reports: 04/08/2009	Last EDR Contact: 01/22/2009
Number of Days to Update: 76	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

HWP: EnviroStor Permitted Facilities Listing

Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

Date of Government Version: 08/14/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 08/14/2023	Telephone: 916-323-3400
Date Made Active in Reports: 10/31/2023	Last EDR Contact: 11/10/2023
Number of Days to Update: 78	Next Scheduled EDR Contact: 02/26/2024
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Date of Government Version: 06/29/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/29/2023	Telephone: 916-440-7145
Date Made Active in Reports: 09/19/2023	Last EDR Contact: 10/04/2023
Number of Days to Update: 82	Next Scheduled EDR Contact: 01/15/2024
	Data Release Frequency: Quarterly

HWTS: Hazardous Waste Tracking System

DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 08/04/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 08/09/2023	Telephone: 916-324-2444
Date Made Active in Reports: 10/26/2023	Last EDR Contact: 09/27/2023
Number of Days to Update: 78	Next Scheduled EDR Contact: 01/15/2024
	Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2021	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/05/2022	Telephone: 916-255-1136

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

UTM Y (Meters):	4226792.5
Elevation:	6 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50007645 RIO VISTA, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Valdez

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 5.6
2	11 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 5.6

Soil Map ID: 2

Soil Component Name: Pescadero

Soil Surface Texture: clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 9 Min: 7.9
2	3 inches	33 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 9 Min: 7.9
3	33 inches	68 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 9 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX

Site Owner/Occupant Questionnaire

The following questions are for: (1) the current owner of the property, (2) any major occupant of the property or, if the property does not have any major occupants, at least 10% of the occupants of the property, and (3) in addition to the current owner and the occupants identified in (2), any occupant likely to be using, treating, generating, storing, or disposing of hazardous substances and/or petroleum products on or from the property. A major occupant is any occupant using at least 40% of the leasable area of the property or any anchor tenant when the property is a shopping center. In a multi-family property containing both residential and commercial uses, residential occupants do not need to respond to this questionnaire unless they are involved in or have knowledge of the commercial or other uses.

Address: APNs 177-110-130; 0177-110-260; 0177-150-010, Rio Vista, CA 94571
Description of Site: Approximately 350 acres of undeveloped grassland/managed wetlands at south end of Yolo Bypass bounded by Cache Slough/Sacramento River on southeast.

Question	Owner			Occupants (if applicable)		
1a. Is the property used for an industrial use? Explain if yes:	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
1b. Is any adjoining property used for an industrial use? Explain if yes: Property to southwest is a quarry	<input checked="" type="radio"/> Yes	No	Unk	Yes	No	Unk
2a. Have you observed evidence of or do you have any knowledge that the property has been used for an industrial use in the past? Explain if yes:	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
2b. Have you observed evidence of or do you have any knowledge that any adjoining property has been used for an industrial use in the past? Explain if yes: Property to southwest is a quarry	<input checked="" type="radio"/> Yes	No	Unk	Yes	No	Unk
3a. Is the property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)? Explain if yes:	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
3b. Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)? Explain if yes:	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk

Question	Owner			Occupants (if applicable)		
4a. Have you observed evidence of or do you have any knowledge that the property was previously used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
4b. Have you observed evidence of or do you have any knowledge that any adjoining property was previously used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
5a. Are there currently any damaged or discarded automotive or industrial batteries, petroleum products, pesticides, paints or other chemicals in individual containers of > 5gal (19L) in volume or 50gal (190L) in the aggregate, stored on or used at the property or facility?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
5b. Have you observed evidence of or do you have any knowledge that there have been previously any damaged or discarded automotive or industrial batteries, petroleum products, pesticides, paints or other chemicals in individual containers of > 5gal (19L) in volume or 50gal (190L) in the aggregate, stored on or used at the property or facility?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
6a. Are there currently any industrial drums (typically 55 gal [208L]) or sacks of chemicals located on the property or at the facility?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
6b. Have you observed evidence of or do you have any knowledge that there have been previously any industrial drums (typically 55 gal [208L]) or sacks of chemicals located on the property or at the facility?		<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
7a. Have you observed evidence of or do you have any knowledge that fill dirt has been brought onto the property that originated from a contaminated site?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						

7b. Have you observed evidence of or do you have any knowledge that fill dirt has been brought onto the property that is of an unknown origin?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
8a. Are there currently any pits, ponds, or lagoons located on the property in connection with waste treatment or disposal?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
8b. Have you observed evidence of or do you have any knowledge that there have been previously any pits, ponds, or lagoons located on the property in connection with waste treatment or disposal?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
9a. Is there currently any stained soil on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
9b. Have you observed evidence of or do you have any knowledge that there has been previously any stained soil on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
10a. Are there currently any registered or unregistered storage tanks (aboveground or underground) located on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
10b. Have you observed evidence of or do you have any knowledge that there have been previously any registered or unregistered storage tanks (aboveground or underground) located on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
11a. Are there currently any vent pipe, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
11b. Have you observed evidence of or do you have any knowledge that there have been previously any vent pipe, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						

12a. Are there currently any flooring, drains, or walls located within the facility that are stained by substances other than water or were emitting foul odors?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
12b. Have you observed evidence of or do you have any knowledge that there have been previously any flooring, drains, or walls located within the facility that are stained by substances other than water or were emitting foul odors?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
13a. If the property is served by a private well or non-public water system, is there evidence of or do you have knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
13b. If the property is served by a private well or non-public water system, is there evidence of or do you have knowledge that the well has been designated as contaminated by any government/health agency?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
14. Do you have any knowledge of environmental liens of governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
15a. Have you been informed of the past existence of hazardous substances and/or petroleum products with respect to the property or any facility located on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
15b. Have you been informed of the current existence of hazardous substances and/or petroleum products with respect to the property or any facility located on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
15c. Have you been informed of the past existence of environmental violations with respect to the property or any facility located on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
15d. Have you been informed of the current existence of environmental violations with respect to the property or any facility located on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						

16. Do you have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances and/or petroleum products on, or contamination of, the property or recommended further assessment of the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
17. Do you know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substances and/or petroleum products involving the property by any owner or occupant of the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
18a. Does the property discharge wastewater, on or adjacent to the property, other than stormwater, into a stormwater sewer system?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
18b. Does the property discharge wastewater, on or adjacent to the property, other than stormwater, into a sanitary sewer system?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
19. Have you observed evidence of or do you have any knowledge that any hazardous substances and/or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the property?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are records indicating the presence of PCBs?	Yes	<input checked="" type="radio"/> No	Unk	Yes	No	Unk
Explain if yes:						

Unk – “unknown” or “no response”

Additional Questions

A) Describe the current use of the property.

Grazing/waterfowl hunting

B) How long has the property been used for this purpose?

Approximately 30 years

C) How long have you owned the property?

4 years

D) List the existing structures on the property and their age.

Natural gas well – approximately 70 years – Idle well, scheduled for abandonment/removal in 2024.

E) Describe the past uses, owners, and operators of the property. (Be as detailed as possible and note approximate time periods.)

Past uses have been entirely agriculture and natural gas exploration. Freshwater marsh until early 1940's.

F) Do any environmental documents exist for the Site such as environmental site assessment reports, environmental compliance audit reports, environmental permits, registrations for storage tank or any other environmentally related documents for the property?

Yes, a Phase I was completed by GEOCON for the property under project name Powell Property in February 2019 and Cache Slough Mitigation Bank in 2022 (Project No. S1701-03-01)
