**COUNTY OF SOLANO
NOTICE OF INTENT TO ADOPT A
MITIGATED NEGATIVE DECLARATION**

The Solano County Department of Resource Management has evaluated the project described below and has determined that a Mitigated Negative Declaration of environmental impact be prepared pursuant to the California Environmental Quality Act.

The Recology Vallejo Facility is requesting to obtain a Solid Waste Facility Permit (SWFP) for a large-volume transfer station, which would allow the operator to increase its permitted daily processing capacity to 300 tons per day of mixed recyclables (cans, bottles, paper, etc.) and organics (green and food waste). Currently the facility only processes mixed recyclables and green waste (approximately 177 tons per day). The proposed project would also allow for the inclusion of food waste into the existing green waste collection service. The addition of food waste would not increase truck trips or traffic, as food waste would be collected as part of existing collection routes. Overall, the project would generate a negligible increase in trips and traffic in the vicinity of the project site. The SWFP would apply to the entire 9.36-acre property and would include both the recycling and food/green waste activities. The proposed project would not be permitted to receive Municipal Solid Waste (MSW) or construction and demolition (C&D) materials.

Copies of the environmental document are available for public review at the Solano County Department of Resource Management, 675 Texas Street, Suite 5500, Fairfield, California, and at solanocounty.com under Resource Management Department, Environmental Health, Technical Services Program, Solid Waste Management Program. Written comments on the proposed Negative Declaration will be accepted until 5:00 p.m. on June 9, 2014, and can be sent to David Weiss at the address listed above or emailed to dlweiss@solanocounty.com.
