DNA EXONERATES ORIGINAL SUSPECT IN 1987 KIDNAP AND MURDER OF 6-YEAR-OLD JEREMY STONER

In October 2022, DA Cold Case investigators Kevin Coelho and Steve Howisey began to take another look at the 1987 case involving the murder of six-year-old Jeremy Stoner. They sent evidence collected at the autopsy to a DNA laboratory and were able to get a DNA profile. The profile did not match Shawn Melton, the original suspect tried for

Jeremy's murder. It was then, they rolled up their sleeves and poured through thousands of pages of police reports to see who was responsible. On September 18, 2023, Fred Cain (69-yr-old) was arrested in Oregon for the murder of Jeremy Stoner. Cain is currently pending murder charges in Solano County Superior Court.

"I am so thankful to have such dedicated cold case investigators that no matter how much time goes by, they remain steadfast in their commitment to solving these horrific cases," District Attorney Krishna Abrams said.
